

Pro Cinema LS12000 4K PRO-UHD^{®1} Laser Projector

3-Chip 3LCD with HDR10+²
and UltraBlack™ Technology

Theater. Redefined.

4K PRO-UHD¹ — Advanced pixel-shifting technology works in parallel with three individual high-definition LCD chips to produce an exceptionally sharp 4K picture without sacrificing picture brightness

Precision Shift Glass Plate Technology — Unique digitally controlled Precision Shift Glass Plate precisely refracts pixel light to display a 3840 x 2160, 8.29-million-pixel image for an exceptionally sharp and clear 4K picture

Epson[®] ZX Picture Processor — Our most advanced video processing technology to date, the proprietary 36-bit Epson ZX Picture Processor handles real-time color, contrast, HDR², frame interpolation and resolution enhancement to faithfully reproduce the source material the way it was intended to be shown

Laser Array Light Source — True multi-array laser diodes produce an ideal light source to power the unique 3-Chip 3LCD Projector Engine for quick turn-on, incredible picture brightness, black contrast and color accuracy

High Picture Brightness — Impressive 2,700 lumens of color and 2,700 lumens of white brightness³ for an exceptional picture in virtually any theater environment – even in rooms with ambient light

True 3-Chip 3LCD Projector Engine — Advanced 3LCD technology uses three individual LCD chips to continuously display 100% of the RGB color signal for every frame. This allows for outstanding color gamut while maintaining excellent brightness without any rainboding or color brightness issues seen with other projection technologies

Impressive HDR — Full 10-bit HDR² color processing accepting 100% of the HDR source information to faithfully reproduce HDR, HDR10+ and HLG (Hybrid Log Gamma) content for an exceptional visual performance. Real-time HDR curve adjustment allows for 16 steps of control to fine-tune the HDR performance regardless of the content

120 Hz Refresh Rate — Refresh rates up to 120 Hz allow for smoother motion for supported content while providing the option for impressive Frame Interpolation for content below 120 Hz

1 4K Resolution Enhancement Technology shifts each pixel to produce an image on screen, up to the stated specification.
