## PRODUCT OVERVIEW

Audiophiles can plug into a better AV experience with HiFi cables that sound as good as they look. Velox once again proves that what's on the inside is just as important as its great aesthetics on the outside. Using only the finest materials and construction, these 12 gauge cables deliver the purest undegraded sound possible to your speakers. They feature high purity oxygen-free copper with hundreds of tightly woven solid-core conductors for excellent conductivity. To allow better flexibility, cotton paper separates the PVC jacket and conductors and cotton yarn supports the twist shape design. The low-density polyethylene insulation for each conductor avoids adding bulk, allowing the woven, flexible outer jacket to protect the cable from wear and tear without making it too stiff for installation. The BFA terminations allow a greater surface area between the cable and the terminal and are 24K gold plated with anodized aluminum terminals.

- HiFi-ready 12 gauge BFA terminated speaker cables
- 12 AWG copper conductors
- 24K gold plated BFA terminations
- Anodized aluminum terminals for easy identification
