PRODUCT OVERVIEW

The new HDM-EDIDB3 was developed specifically for the video security integrator that needs to connect surveillance NVR/DVR's to multiple displays. EDID information can lock systems and splitters up and prevent the image from displaying. The HDM-EDIDB3 is a handy tool that eliminates EDID that causes the issue while still sending all audio and video signals.

- Small form factor
- High value solution
- Plug and go performance

NOTE: The HDM-EDIDB3 can only be used with surveillance DVR's & NVR's and cannot be used with any other A/V sources.
