

# PROFICIENT®

High Performance Landscape Speakers

Signature  
SERIES

## Think Outside the Home

Whether you're hosting an elegant garden party, a raucous celebration or just singing in rain, the Proficient® Signature Series Landscape Speakers will exhilarate. The combination of bold, indoor-level, audio performance and all-weather durability make these Signature Series landscape speakers a fit for outdoor spaces of all sizes. The speaker enclosures are constructed from UV stable fiberglass reinforced ABS and weatherproof acoustic components, built to withstand even the harshest climates and environments.

These satellite speakers are available in two models, with either a 4- or 6-inch polypropylene driver. They feature an easy to disguise compact form factor and 110-degrees of sound dispersion. Low and high impedance capabilities coupled with outstanding fidelity, the Proficient Signature Series speakers provide installation flexibility and acoustic harmony to any backyard.

# SATELLITE SPEAKERS

SERIES

## FEATURES

**Durable Weatherproof Design** - Weatherproof fiberglass reinforced ABS enclosures are rugged, ensure years of reliable performance and are no match for weed whackers and other outdoor lawn equipment.

**Adjustable Volume Control** - Need it louder near the pool but quieter near your eating area? No problem! Control the relevant volume of each speaker individually by adjusting the tap switch settings on the back of each speaker when operating in 70V/100V mode.

**Nickel-Plated Brass Fittings** - We've addressed a common failure point among other landscape speakers by relying on solid brass fittings that are then nickel plated rather than plastic.

**Better Coverage** - 110-degree wide dispersion ensure outdoor filling sound with better coverage than a traditional speaker.

**Mounting Options** - Quick connect accessories, sold separately, make ground, surface and conduit mounting easy and reliable.
